docx 14. Download: .docx **Electronic supplementary material** The online version of this article (10.1186/s12862-017-1017-0) contains supplementary material, which is available to authorized users. Availability of data and materials {#FPar1} ================================== Data supporting the conclusions of this article are included within the article and its additional files. The data set for this study will be uploaded to a public repository after the approval of the Ethical Committee of the Commission of Bioethics of the University of Chile. Funding {#FPar2} ======= None. VHG conceived the study, participated in the design of the study, supervised and performed the statistical analysis, and drafted the manuscript. LSJ contributed to data collection and analysis. HMV participated in the design of the study, and helped to draft the manuscript. GCLP helped with the statistical analysis and drafted the manuscript. All authors read and approved the final

manuscript. Ethics approval and consent to participate {#FPar3} == This study was approved by the Institutional Review Board of the Catholic University of Chile (Acta No. ADR2016--058). All participants were recruited by an official advertisement sent to families and were interviewed after providing informed consent. Competing interests {#FPar4} ==================== The authors declare that they have no competing interests. Publisher's Note {#FPar5} ================= Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations. Agronomy and Phytochemistry of Plants: Plants that Produce Phytochemicals Used to Fight Disease Insecticides: EPA has approved sulfuryl fluoride as a pesticide for use on crops that are used for human or animal consumption. It also has been registered as an insecticide for use against a wide range of agricultural pests. Sulfuryl fluoride is safe to apply to food and feed crops, but is toxic to animals. See the gallery page for links to the SCIENCE and THE ANNALS of American Horticulture papers about sulfuryl fluoride and other pesticides.Q: Does the "where" clause affect the generated SQL when calling NHibernate? For example, let's say we have an IQuery object which has 82157476af
